FOREWORD:

It is with great pleasure that I present the Niger State Primary Health Care Development Agency Baseline Mapping and Recruitment Plan for the period 2026–2030. This strategic document reflects our unwavering commitment to strengthening the primary healthcare workforce, which is the backbone of effective and equitable health service delivery in Niger State.

Recognizing that a competent, well-distributed, and motivated health workforce is fundamental to achieving improved health outcomes, this plan provides a comprehensive framework to address existing gaps and disparities in staffing across our primary healthcare facilities. Through a rigorous Baseline Mapping Exercise, we have identified critical shortages and areas requiring urgent attention, particularly in rural and underserved communities.

Our recruitment strategy emphasizes targeted, data-driven approaches to attract, retain, and develop skilled health professionals, ensuring that every community in Niger State has access to quality care. The plan also integrates capacity building and robust HR management systems to sustain workforce growth and performance.

I commend all stakeholders who contributed to this plan and urge its full implementation to realize our shared vision of a resilient and responsive primary healthcare system. Together, we can build a healthier Niger State.

Signed:

Dr Murtala Muhammad Bagana, MBBS, MPH, MBA
Commissioner for Health Niger State

ACKNOWLEDGEMENT:

The successful development of the Niger State Baseline Mapping and Recruitment Plan 2026–2030 is a testament to the collaborative efforts of many dedicated individuals and institutions. I extend my sincere gratitude to the technical working groups, health facility managers, data analysts, and all partners who provided valuable insights and data critical to the comprehensive HRH profiling and gap analysis.

This plan represents a significant milestone in our ongoing efforts to strengthen human resources for health within the primary healthcare sector. It provides a clear, actionable roadmap for addressing workforce challenges and improving health service delivery across the state.

I acknowledge the leadership and support of the Honorable Commissioner and Permanent Secretary, Ministry of Health and other government agencies, whose commitment has been instrumental in driving this initiative. I also appreciate the continuous cooperation of the ED, NSPHCDA and health workers in the department of DPRS as well as community stakeholders who remain central to our success.

We look forward to the coordinated implementation of this plan and remain committed to monitoring progress and adapting strategies to meet the evolving health needs of Niger State's population.

Dr Yahaya Mustapha Makanta
Ag Director, Planning, Research and Statistics
Niger State Primary Health Care Development Agency

1.0 EXECUTIVE SUMMARY

This document outlines the result of the Baseline Mapping Exercise and a strategic 5-year recruitment plan, designed to address the critical health workforce needs within the Niger State Primary Health Care Development Agency. The plan serves as a comprehensive framework for optimizing the existing healthcare workforce, identifying areas of shortage and disparity, and ensuring the equitable distribution of qualified personnel across the state's primary health care facilities. Recognizing the pivotal role of a competent and motivated health workforce in delivering quality healthcare services, this plan aims to strengthen the foundation of primary healthcare delivery through data-driven HRH management.

The core of this document is a detailed Baseline Mapping exercise, utilizing existing healthcare workforce data, showing the current staffing position in all the primary healthcare facilities and gaps by experience, positions/roles, geographical placement, etc. Specifically, this mapping provides a clear understanding of the current workforce distribution, revealing critical gaps in staffing levels, particularly in rural and underserved areas.¹ The analysis focuses on identifying shortages in key roles such as medical doctors, midwives, nurses, community health officers (CHO) and community health extension workers (CHEWs), which are essential for meeting minimum standard package and providing comprehensive primary healthcare services. The data collected is analyzed to develop targeted recruitment strategies that prioritize areas with the greatest need.

Based on the mapping results, the document proposes a phased recruitment plan aimed at attracting and retaining qualified healthcare professionals. These strategies include:

- Targeted recruitment campaigns, leveraging digital platforms and community outreach to reach potential candidates.
- Implementation of competitive compensation and benefits packages to attract and retain skilled professionals.
- Establishment of mentorship and professional development programs to foster career growth and enhance job satisfaction; and
- Exploration of innovative recruitment models, such as partnerships with training institutions and community-based recruitment initiatives.

Furthermore, the plan emphasizes the importance of strengthening HRH management systems through the development of standardized HRH policies, procedures, and tools. This will include

the implementation of a robust HRH information system to facilitate data collection, analysis and reporting. Additionally, the report advocates for capacity building initiatives to enhance the skills of HRH managers in areas such performance management, workforce planning, employee relations, etc. The total projected cost for the five-year implementation is ₦1,156,920,782.90, distributed progressively across the implementation period. The highest investment occurs in the mid-term expansion phase, reflecting intensified recruitment. Junior Community Health Extension Workers (JCHEWs) and Nurses/Midwives constitute the largest share of the recruitment cost due to the magnitude of their staffing gaps.

To ensure the successful implementation of this 5-year plan, a multi-stakeholder coordination approach was adopted, involving collaboration with relevant government agencies, training institutions, professional associations, and community leaders. Regular monitoring and evaluation mechanisms have been established to track progress, identify challenges, and make necessary adjustments. The plan will be reviewed and updated periodically to reflect changing healthcare needs and emerging best practices. By implementing this strategic framework, the Niger State Primary Health Care Development Agency aims to build a resilient and responsive health workforce that can effectively address the healthcare needs of its population and contribute to the achievement of national and state health goals.

2.0 INTRODUCTION

2.1 Background:

Institutions thrive when they have the right people in the right roles. Baseline Mapping provides a snapshot of existing talents within the institution, highlighting strengths and areas for improvement. Coupled with a recruitment plan, this approach ensures the institution is adequately staffed with skilled personnel who contribute to overall success. It also facilitates proactive planning to address future talent demands in alignment with establishment goals.³

The Baseline Mapping and Recruitment Plan is a strategic initiative designed to address the critical HRH challenges facing Niger State Primary Health Care Development Agency (NSPHCDA) facilities. Recognizing that a well-distributed, adequately staffed, and highly skilled healthcare workforce is fundamental to delivering quality healthcare services, The plan acknowledges the complexities of healthcare delivery within the PHC facilities, including geographical disparities, varying service demands, and the need for specialized expertise. By accurately mapping the current workforce and identifying gaps, this plan seeks to ensure that PHC facilities within the NSPHCDA are equipped with the necessary personnel to meet the healthcare needs of the population.

This plan aims to provide a data-driven framework for optimizing existing resources and strategically recruiting new talent. The Recruitment Plan complements the mapping process by establishing mechanisms to attract, train, and retain health professionals in areas of critical need. Innovative strategies are developed to address recruitment challenges, particularly in underserved regions, ensuring alignment with the state's broader health policy objectives. By prioritizing roles and specialties with the greatest impact on health outcomes, the plan fosters sustainable workforce growth and enhances the delivery of essential health services.

2.2 Rationale for the Niger State Baseline Mapping:

The rationale for the Niger State Baseline Mapping is rooted in addressing critical challenges within the health workforce to improve service delivery and health outcomes. Niger State has faced issues such as inadequate staffing, low productivity, and uneven

distribution of health workers, which hinder the effectiveness of its primary health care system.⁴

2.3 Problem Statement:

Primary Health Care (PHC) facilities serve as the cornerstone of community health services, the PHC facilities in Niger State are facing a critical human resource for health (HRH) crisis, characterized by significant shortages, inequitable distribution, and suboptimal utilization of healthcare personnel. This crisis directly impacts the quality, accessibility, and effectiveness of primary healthcare services, hindering the state's ability to achieve its health goals and improve population health outcomes.¹

Insufficient human resource planning, compounded by the lack of effective recruitment strategies, has led to significant gaps in the availability of qualified health professionals. These gaps negatively impact the delivery of essential health services, including preventive care, maternal and child health services, and the management of communicable and non-communicable diseases.

The absence of a comprehensive human resource mapping framework means that PHC facilities lack a clear understanding of their current workforce capabilities and existing gaps. This oversight often results in uneven distribution of staff, under-utilization of existing talents, and an inability to effectively identify and address skill shortages. Furthermore, high attrition rates, poor working conditions, and limited opportunities for professional development discourage both recruitment and retention of health workers.

Without a strategic recruitment plan tailored to the needs of PHC facilities, it becomes increasingly difficult to attract qualified professionals, especially in underserved and rural areas. As a result, communities relying on these facilities face limited access to quality health care services, which undermines the overall goal of achieving universal health coverage.

This problem necessitates a focused and systematic approach to human resource mapping and recruitment plan. Addressing these challenges will enable PHC facilities to optimize their workforce, ensure equitable service delivery, and improve health outcomes for the populations they serve

2.4 Purpose of Baseline Mapping and Strategic Plan:

The main purpose of this exercise is to ensure that the PHC facilities in Niger state has the human capital it needs to meet the needs of the people based on minimum requirement, both in the present and future. It helps in evaluating the adequacy of existing staff, identifying skill gaps, and strategically planning recruitment and development activities. This process is crucial in creating a workforce that is competent, engaged, and prepared for evolving PHC service delivery challenges. Specifically, these processes aim to:

- **Identify HRH Gaps and Imbalances:** Analyse a comprehensive assessment of the current healthcare workforce to determine areas of shortage or imbalance in specific roles, specialties, or regions.
- **Optimize Existing Resources:** Maximize the utilization of the existing healthcare workforce by analyzing current distribution and identifying opportunities for redistribution or skill enhancement.
- **Develop Targeted Recruitment Strategies:** Create and implement effective recruitment strategies to attract and retain qualified healthcare professionals, addressing identified gaps and ensuring equitable distribution.
- **Strengthen HRH Management Systems:** Improve the overall management of the healthcare workforce through the development of standardized policies, procedures, and information systems.
- **Enhance Healthcare Service Delivery:** Ultimately, improve the quality and accessibility of healthcare services by ensuring that healthcare facilities are adequately staffed with competent professionals.

Key Objectives:

To achieve the plan's purpose, the following key objectives will guide the mapping and recruitment exercise:

1) Comprehensive Baseline Mapping:

- a) Analyse data on the current healthcare workforce, including demographics, qualifications, roles, and geographical distribution.
- b) Utilize existing data sources and conduct field assessments to ensure data accuracy and

completeness.

c) Develop detailed HRH profiles for each healthcare facility and region.

2) Identify HRH Shortages and Imbalances:

a) Analyse the mapped data to identify areas with critical shortages in specific healthcare roles and specifications.

b) Determine geographical disparities in workforce distribution, focusing on underserved and rural area

c) Assess the alignment of the current workforce with the population's healthcare needs

3) Develop Targeted Recruitment Strategies:

a) Design recruitment campaigns tailored to address specific HRH gaps and attract qualified candidates.

b) Explore innovative recruitment models, such as partnerships with training institutions and community-based recruitment initiatives.

c) Develop competitive compensation and benefits packages to attract and retain skilled professionals.

4) Strengthen HRH Management Systems:

a) Develop and implement standardized HRH policies and procedures for recruitment, deployment, performance management, and retention.

b) Establish a robust HRH information system to facilitate data management and reporting.

c) Provide capacity building training for HRH managers and administrators.

5) Monitor and Evaluate the Impact of the Plan:

a) Establish a monitoring and evaluation framework to track progress and assess the impact of the recruitment and distribution strategies.

b) Conduct periodic reviews and make necessary adjustments to the plan based on the evaluation findings.

c) Ensure data driven decision making.

6) Ensure Equitable Distribution of Healthcare Professionals:

a) Develop strategies for the equitable distribution of healthcare professionals across all regions and facilities.

b) Prioritize the deployment of qualified personnel to underserved and rural areas.

c) Implement incentive programs to encourage healthcare professionals to work in challenging environments.

3.0 NIGER STATE PROFILE

3.1 State Profile:

Niger state is a state in the North Central Geopolitical Zone of Nigeria with Minna as the capital. Other major cities are Bida, Kontagora and Suleja. The state was created in 1976 from the then North-Western State. The Nupe, Gbagyi, Kamuku, Kambari, and Hausa form most numerous indigenous tribes of the State. The State is divided into 3 senatorial districts; Niger South (Zone A), Niger Central (Zone B) and Niger North (Zone C) with 25 Local Government Areas and 274 political wards.⁵

The state is bounded to the South by the river Niger and bounded by the states of Kebbi and Zamfara to the North, Kaduna to the North and Northeast, Kogi to the Southeast, and Kwara to the South. The Abuja Federal Capital Territory is on Niger state's Eastern border, and the Republic of Benin is its Western border. The state has a land mass of 68,925 km², the largest state in the country and a 2016 estimated population of 5,556,200. The landscape consists mostly of wooded savannas and includes the floodplains of the river Kaduna. Most of the populace in the state (85%) are farmers while the remaining 15% are involved in other vocations such as white-collar jobs, business, craft and arts. About 60.6% of Niger's population is employed, with approximately 90% employed in the informal sector and the State's poverty incidence of 33.9% is far lower than the North Central average of 59.7%.⁶

3.2 Organization of Health Services in Niger State:

Nigeria operates 3 main levels of healthcare system in Nigeria that follow the structure of the government.⁷ The federal government handles the tertiary healthcare, the state handles the secondary healthcare, while the local government takes charge of the primary healthcare with overlaps as necessary.⁷ The state has 2 tertiary healthcare facilities, 23 secondary healthcare facilities and 1,582 PHC facilities in the state.

Figure 2: Health Facilities Organizational Structure

The Hospitals Management Board (HMB) manages the secondary healthcare facilities under Ministry of Health (MOH), while the state-owned tertiary healthcare facility, Ibrahim Badamasi Babangida Specialist Hospital, Minna, is managed by its management board/MSTH. The federal tertiary facility, federal Medical Centre, Bida owned by the federal government, is managed by her board under the Federal Ministry of Health (FMOH).

3.3 State Health Indices:

According to NDHIS 2023-24, Niger state health indices show neonatal mortality rate (NMR) of 22 deaths per 1000 live births, Infant mortality rate (IMR) of 31 deaths per 1000 live births, Under- 5 mortality rate (U5MR) of 49 deaths per 1000 live births.⁹

Figure 3: Child health Indices Nigeria Vs Niger state

Niger State still faces significant challenges in maternal health, including high maternal mortality rates and poor uptake of maternal health services at the community levels.⁹ One in every 95 women die during pregnancy and childbirth which translates to an annual estimate of 1,934 deaths from pregnancy-related complications. Majority of these deaths occur in rural areas which are in hard- to-reach communities due to the bad terrain of the state.¹⁰

Figure 4: Uptake of Maternal Health Services in Niger State

Facility Type	Description	Minimum Personnel Requirement
1 Health Post 	- A health facility domiciled in at the settlement or village level - Serves a population of 500	At least one JCHEW
2 Primary Health Clinic 	- A health facility that serves a group of villages or communities - Serves a population of 2,000-5,000	- Nurse/Midwife – 2 - CHEW – 2 - JCHEW – 4
3 Primary Health Care Centre 	- A health facility that serves a political ward - Serves a population of 10,000-20,000	- Medical Officer – 1 - CHO - 1 - Nurse/Midwife – 4 - CHEW – 3 - Pharmacy technician – 1 - JCHEW – 6 - Environmental Health Officer – 1 - Medical Records Officer – 1 - Laboratory technician - 1
Health facilities were categorized based on Minimum Service Package guidelines		

Figure 5: Categorization Criteria of PHC Facilities According to MSP

3.4 State Primary Healthcare Facilities

There are 1,582 PHC facilities in Niger state categorized into 3, Health Post, Primary Health Clinic and Primary Health Care Centre (PHCC) according to minimum standard package guideline. Based on the categorization, Niger state has 469 (29.6%) PHCC, 937 (59.3%) Primary Health Clinic and 176 (11.1%) Health Post spread across the 25 LGAs of the state.

Figure 6: Distribution of PHC facilities in Niger State

A total of 5,154 healthcare workers were recently profiled in the PHC facilities across the 25 LGAs of the state. Out of which 4,907 (95.2%) are MSP personnel and 247 (4.8%) are other healthcare workers that include health attendants, nurses' aides, cleaners and drivers. CHEW and JCHEW constitute about 75% of the state's PHC facilities HRH and could present the state with room for optimal service delivery across healthcare facilities. Fewer nurse/midwives and doctors may limit the range of services provided in most facilities and possible bearing and overburdening of CHEWs and JCHEWs.

Figure 7: Distribution of PHC Facilities HCWs

Figure 8: Distribution of HCWs Across HCF Type in the LGAs

Figure 9: Distribution of HCWs Disaggregated by Gender Across Cadre

While rural LGAs have about 177 HCWs per LGA (3545/20), the urban LGAs have 272 HCWs per LGA (1362/5). Overall, this reflects a 1:1.5 rural-urban LGA ratio in the State.¹ This affirms existing literature¹ which shows that a shortage of HCW in the rural areas is common; necessitating the need for rural-driven policies and incentives to motivate a more equitable staff distribution. These incentives must also be gender-sensitive to ensure female HCWs are motivated to provide services in rural areas.

Figure 10: Distribution of HCWs in Urban Vs Rural LGA

4.0 BASELINE MAPPING PROCESS

The Baseline Mapping process involves a systematic approach to understanding the availability, distribution, and needs of health workers within a given area.³ This process is crucial for ensuring that health systems have the right number and mix of skilled professionals to deliver quality healthcare services.

The National Primary Health Care Development Agency (NPHCDA) through National Emergency Maternal and Child Health Intervention Center (NEMCHIC) seeks to improve suboptimal MNCH outcomes in the country by optimizing the availability of quality Reproductive, Maternal, Neonatal, Child and Adolescent Health + Nutrition (RMNCAH+N) services at PHC facilities. To achieve this, NEMCHIC conducted a National PHC HRH Profiling and PEA across 10 BMGF States to identify and address gaps, the PEA help to understand the HRH political and economic landscape.¹

4.1 PHC HRH Profiling and PEA Exercise:

Together, HRH profiling and PEA provide a comprehensive understanding of the challenges and opportunities in PHC workforce management. These insights are critical for developing evidence-based strategies to improve health outcomes and achieve universal health coverage. The HRH Profiling and PEA exercise was conducted using a five-step approach detailed in Figure 11.

Figure 11: Approach to HRH Profiling and PEA Exercise Conducted in the State

4.2 Human Resource for Health Availability and Gap Analysis.

Using the PHC MSP requirements, staffing gaps were observed on available permanent staff across all 9 HRH cadres in the state.^{1,4} Huge staffing gaps existing in the Nurse/Midwife, CHEW, and JCHEW cadres that are critical to the provision of RMNCAH+N services, may have a significant negative impact on the availability of MNCH service delivery in the State.

n = 3559			
● Surplus ● Gap			
Cadres	Required	Available Staff	Gap/Surplus
CHEW	3281	1795	1486
CHO	469	183	486
Environmental Health Officer	469	135	334
JCHEW	10310	813	9497
Laboratory Personnel	469	330	139
Medical Officer	469	3	464
Medical Records Officer	469	75	394
Pharmacy Personnel	469	15	454
Nurse/Midwife	3750	106	3644

Figure 12: PHC MSP Requirements, Staffing Gaps on Available Permanent Staff Across all 9 HRH Cadres

Figure 13: Gaps Among Permanent Staff Across Key Cadres Filled by Volunteers

The State PHC centers have identified staffing gaps across all cadres according to MSP guidelines. These gaps are more significantly observed in the nurse/midwife and pharmacy personnel cadre. this depicts a gross deficit in the required skill-mix for the full spectrum of health services required.

Figure 14: Staffing Gaps Across the 9 Cadres in PHC Centers in the State

Figure 15: Staffing Gaps Across all the MSP-Required Cadres for Health Posts and PHC clinics in the State

There are staffing gaps across all the MSP-required cadres for health posts and PHC clinics in the state, with JCHEW having the most gap among the 2 categories. However, the PH clinics showed highest personnel gap in the nurse/midwife cadre, this is of implicit concern for the state due to the critical role nurses/midwives play in the provision of MNCH services.

In the next 4 years, a total of 179 HCWs is projected to exit active service across all PHC facilities. Retirement remains the biggest reason for staff exit from active services in the state which adds to the already depleted workforce. The JCHEW cadre have the highest exit across cadres, if this trend continues, it could have a significant impact on the delivery of primary health services statewide.

Cadre	2026	2027	2028	2029	4-Yr Total	Est. Retirements	Est. Deaths
CHEW	17	16	15	13	61	46	15
EHO	5	4	4	4	17	13	4
JCHEW	21	20	18	17	76	57	19
MLT	2	2	2	2	8	6	2
Nursing	3	3	3	3	12	9	3
Pharmacist	2	1	1	1	5	4	1
All Cadres	50	46	43	40	179	134	45

Figure 16: Staff that Exited from Active Service Across all PHC Facilities

4.3 HRH Training Needs:

This refers to the gaps between the current competencies of health workers and the skills, knowledge, and behaviors required to effectively meet health system goals and population needs.⁷ Training and re-training remains a critical component of strengthening the health workforce to meet the demands of evolving healthcare systems. Identifying and addressing HRH training needs ensures that health workers are equipped with the skills and knowledge required to deliver quality care.

Majority of the CHEWs, CHOs and JCHEWs have not attended recommended trainings in the 2 years preceding the assessment. Inservice training coverage rate is low, and this will affect the quality of services available across facilities. Given the level of work required of CHEWS and CHOs across facility points, routine in-service trainings must be prioritized for them to perform optimally. Nurses where available are required to perform multiple roles in the facilities, hence the need to upskill them through necessary trainings.

Figure 17: Proportion of Trained Staff Disaggregated by Cadre

4.4 State’s HRH Production Capacity:

Human Resources for Health (HRH) production capacity is the ability of the state to train, deploy, and sustain a health workforce that meets the needs of its population. HRH strategies often focus on addressing shortages, improving training programs, and enhancing coordination mechanisms.

Niger State relies on health training institutions, such as College of Nursing Sciences, Bida, School of Midwifery Minna, College of Nursing Sciences and Midwifery Kontagora, to produce health workers. However, these institutions often face challenges such as limited infrastructure, inadequate funding, and insufficient faculty, which constrain their ability to produce enough qualified health professionals. State owned health training institutions produce more CHEWS and Health Education & Promotion professionals, and an average of 33 and 40 medical lab technicians and pharmacy techs have graduated every year since 2018.¹

Figure 18: Niger State Average Annual HRH Production by Cadre (2018-2024)

Figure 19: Average Annual Production of Nurses and Midwives in Niger State

4.5 SWOT Analysis on HRH in the State:²

STRENGTHS • Skilled health workers • Availability of health training institutions for the training of all levels of health workers (Pre-service and In-service training) • Annual promotion of Health personnel • Recruitment of health workers	WEAKNESSES • Inadequate health infrastructure • Mal-distribution of health workers • No State-specific HRH policy • No HRH-education policy • No cadre-specific Job descriptions (JDs) & Standard Operating Procedures
OPPORTUNITIES • Political will • Career development opportunities • Support from some programs like BHCPF on the engagement of temporary staff and CHIPS. • Support from development partners for capacity building, monitoring, and supervision of staff. • Optimization of the state Health Workforce Registry.	THREATS • Political interference in the recruitment and deployment of health workers • Lack of basic amenities in rural and underserved • Negative impact of economic hardship on staff efficiency and welfare • Insecurity discouraging staff from working in certain parts of the State. • Inadequate on-the-job supervision of personnel

Figure 20: SWOT Analysis on HRH in Niger State

5.0 STATE HRH RECRUITMENT PLAN:

Niger State, like many other regions in Nigeria, faces significant challenges in the availability, distribution, and capacity of its health workforce. These challenges have negatively impacted the delivery of quality and equitable healthcare services, especially at the Primary Health Care (PHC) level. Factors such as attrition, inadequate recruitment, rural-urban disparities, and a growing population have further widened the human resources for health (HRH) gap in the state. This situation is particularly critical in rural and underserved areas, where access to quality healthcare services is severely limited.

The lack of adequate HRH hampers the effective delivery of essential health interventions, including maternal and child health, immunization, and disease prevention, leading to poor health outcomes and exacerbating health disparities. To address this issue and improve health outcomes, the Niger State Government, through the Niger State Primary Health Care Development Agency, has developed a comprehensive 5-Year Strategic Recruitment Plan. This plan aligns with national and state health policies, including the National Health Workforce Strategic Plan and the Niger State Health Sector Strategic Development Plan, aiming to progressively close HRH gaps through structured, cost-effective, and sustainable recruitment.

5.1 HRH Strategic Recruitment Goal:

The overarching goal of this plan is to strengthen the health system in Niger State by ensuring the equitable recruitment, distribution, and retention of a competent and motivated HRH workforce across all primary healthcare facilities in the State within five years, thereby significantly improving the quality and accessibility of healthcare services.

5.2 Strategic Objectives:

1. To identify and address critical HRH shortages across all cadres and facilities within the state.
2. To implement a phased and costed recruitment plan that closes 100% of identified HRH gaps over five years focusing on critical roles like nurses/midwives, CHO, CHEWs, and JCHEW.
3. To ensure strategic deployment and equitable distribution of newly recruited health workers, especially to underserved LGAs and rural areas.

4. Develop and implement incentive programs to attract and retain healthcare workers in rural and underserved areas.
5. Strengthen partnerships with training institutions to ensure a continuous pipeline of qualified healthcare professionals.
6. Implement a comprehensive monitoring and evaluation framework to assess the impact of the plan and make necessary adjustments.
7. Establish a robust HRH information system to facilitate data management and reporting.
8. To promote sustainability through stakeholder engagement, policy alignment, and integration with the state budgeting framework.

5.3 State 5-Year Recruitment Plan:

This recruitment plan outlines the State's strategic approach to closing the critical HRH gap over a five-year period through targeted, phased recruitment of skilled health workers. The plan is based on workforce needs assessment and aligned with national and state health development goals.

1. Phase 1: Immediate Action (Year 1):
 - a. Rapid Recruitment: Initiate targeted recruitment campaigns using digital platforms, community outreach, and partnerships with training institutions and ensure NSPHCDA leads recruitment of the HRH
 - b. Redistribute HCWs based on identified gaps and the MSP, to ensure equitable access to healthcare at the community level
 - c. Adapt the national training recommendations and implement adapted training schedule
 - d. Upskill CHEWs, JCHEWs to provide RMNCAH+N services in line with the Task shifting/Task sharing policy
 - e. Develop and implement rural posting incentives for HCWs and optimal implementation of the AOP
 - f. HRH Information System: Establish a centralized database to track HRH data, including staffing levels, qualifications, and distribution.
2. Phase 2: Mid-Term Expansion (Years 2-3):
 - a. Recruit 50% of the HRH gap to address the identified staffing needs

- b. Collaborate with the health training institutions to convert surplus EHOs to CHEWs
 - c. Conduct a salary comparison assessment and upgrade PHC HRH salaries based on the state's economy
 - d. Implement financial and non-financial incentives to attract and retain healthcare workers in rural areas
 - e. Provide training for HRH managers and healthcare workers on relevant skills and competencies.
 - f. Strengthen partnership and collaboration with training institutions to increase the supply of qualified personnel.
3. Phase 3: Long-Term Sustainability (Years 4-5):
- a. Recruit 100% of the 2,509 HRH to address the identified staffing gaps
 - b. Work with health training institution (HTIs) and regulatory bodies to produce sufficient HRH that can potentially be absorbed into the PHC system
 - c. Routinely update the HRH database
 - d. Implement quality assurance measures to ensure the delivery of high-quality healthcare services.
 - e. Establish a robust M&E system to track progress and assess the impact of the plan.
 - f. Develop and implement sustainable HRH policies and procedures.

5.4 Expected Outcomes of the Recruitment Plan:

Table 1: Recruitment Plan and Expected Outcome

	Expected Outcome
Year 1: Immediate Term	25% reduction in immediate HRH gaps.
	Improved data availability and management through the HRH information system.
Years 2-3: Mid-Term	Additional 50% reduction in overall HRH gaps.
	Improved retention rates of healthcare workers in rural areas.
	Enhanced capacity of HRH managers and healthcare workers.
Years 4-5:	100% reduction in HRH gaps and equitable distribution of healthcare professionals.
	Sustainable HRH management systems and policies.

Long Term	Improved quality and accessibility of primary healthcare services.
	Measurable positive change in Maternal and child health indicators.

Table 2: Recruitment Targets by Year

Year	% of HRH Gap to Fill	Focus Areas	Key Activities
Year 1 (2026)	25%	Urgent needs: Nurses, Midwives, CHEWs in rural LGAs	- Emergency recruitment
			- Fast-track onboarding
			- Prioritize rural deployment
Year 2 (2027)	20%	Reinforce PHC & critical secondary facilities	- General practitioner & lab technician recruitment
			- Ongoing recruitment for PHC staff
Year 3 (2028)	30%	Midwives, Doctors, Allied Health Workers	- Strengthen staffing at referral facilities
			- Continued support for PHC level
Year 4 (2029)	15%	Underserved urban LGAs and health posts	- Recruitment based on updated HRH data
			- Focus on quality & supervision roles
Year 5 (2030)	10%	Fill remaining gaps, adjust for attrition	- Finalize recruitment
			- Begin cycle for attrition replacement

5.5 PHC Staffing Gap

In alignment with the national policy of one functional Primary Health Care (PHC) facility per ward, Niger State has adopted the ward-based staffing framework as the foundation for its PHC human resource planning. With 274 wards across the state, this translates to a minimum staffing requirement benchmarked against the National Primary Health Care Development Agency (NPHCDA) national standards, which prescribe the minimum cadre complement required to deliver the essential PHC service package at each facility.

To determine the current staffing situation, the gap analysis was conducted across all LGAs and cadres, comparing available health workers against the minimum staffing norms set by NPHCDA. The analysis reveals significant deficits across several critical cadres, particularly Nurses/Midwives, JCHEWs, Pharmacy Technicians, and Medical Record Officers, which directly affect the capacity of

PHC facilities to deliver quality care. Where cadres are found to have a surplus relative to the MSP requirements — as is the case with CHEWs and Laboratory Technicians — the State will undertake a structured redeployment exercise to redistribute staff from well-served facilities to those with acute shortages, ensuring a more equitable distribution of health workers across the State. Additionally, facilities that fall below the NPHCDA minimum infrastructure standards will be prioritised for renovation and upgrading to ensure that deployed personnel operate within an enabling environment capable of supporting quality service delivery. The results of the gap analysis are presented in Table 3 below.

Table 3: PHC Staff Gap Across Cadre

Cadre	Minimum per PHC	Total Required Across State	Currently Available	Gap (Deficit)
Nurses/Midwives	4	1096	106	990
CHO	1	274	183	91
CHEWs	3	822	1795	0
JCHEWs	6	1644	813	831
Lab Technicians	1	274	330	0
Pharmacy Technicians	1	274	15	259
Environmental Health	1	274	135	139
Medical Record Officer	1	274	75	199
TOTAL	18	4,932	3,452	2,509

5.6 Deployment Plan

Table 4 below presents the strategic deployment and redeployment plan for PHC health workers across Niger State. Based on gap analysis data, LGAs and cadres where current staffing meets or exceeds MSP requirements are identified as redeployment candidates. Staff from surplus areas are proposed for transfer to the highest-deficit receiving LGAs, ensuring equitable distribution in line with the Minimum Service Package (MSP). The planned recruitment efforts will primarily focus on addressing staffing gaps in rural duty stations. This targeted strategy is intended to ensure that underserved communities receive the necessary PHC personnel to deliver effective and accessible

healthcare services. These projected workforce needs have been fully integrated into the overall recruitment and deployment plan to ensure balanced coverage and sustained service delivery across both rural and urban areas. A detailed breakdown of the planned recruitment and deployment by cadre is presented in the table below.

Table 4: Deployment Plan

Cadre	Rural	Urban	Total Gap
Nurses/Midwives	713	277	990
CHO	66	25	91
CHEWs	0	0	0
JCHEWs	598	233	831
Lab Technicians	0	0	0
Pharmacy Technicians	186	73	259
Environmental Health officer	100	39	139
Medical Record Officer	143	56	199

5.7 Strategic Objectives, Activities, Responsible Stakeholders, and Timelines:

Table 5: Strategic Objectives, Activities, Responsible Stakeholder, and Timelines

Priority Area	Strategic Objective	Intervention	Specific Activities	Responsible Stakeholder	Timel ine
Critical HRH	Identify the HRH needs across all PHC HCF	Identify HCW staffing requirements by gender, cadre, and geography	Identify qualified healthcare workers based on identified requirements and specifications	NSPHCDA	0-3 months
		Recruit qualified HCWs based on identified needs	Conduct annual HRH recruitment of Nurse/Midwife, CHEWs, JCHEWs, and yearly	CSC, MOP, NSPHCDA	3-6 months

Shortages	Ensure equitable distribution of PHC HCWs	Define and implement equitable healthcare worker distribution and re-distribution strategy based on MSP and staffing needs	Deploy recruited HRH to the LGAs based on their needs	DPRS, NSPHCDA	6 months
HRH Retention, Motivation, and Performance Development	Continuously motivate and improve the performance of the HCWs towards ensuring	Define and institutionalize HRH performance management systems at the administrative and community level	Review and update APER forms to ensure its functionality	NSPHCDA, LGA DPHC	9-12 Months
		Establish and institutionalize mechanisms for enhancing in-service training for HCWs based on current health sector needs, to enhance their	Implement reward systems for improved performance and productivity		
			Cost in-service training for Niger State PHC HRH		
			Include funding for in-service training in the workplan		
	retention in the PHC system	on-the-job performance and capacity			
		Develop incentives for the PHC workforce with a focus on healthcare workers deployed to rural and HTR areas	Deploy incentives to HCW that currently provide health services in hard-to-reach areas		
			Conduct a salary revision of HCWs in LGAs		
			Increase enrollment target to match the HRH gap		

HRH production	Strengthen production of all HCWs cadres to ensure a demand-supply link, based on state-specific HCWs needs	Increase HRH production training capacity in line with infrastructure, trainers, etc.	Increase trainer to trainee ratio	NSPHCDA, MOE, HTI, Regulatory bodies	
			Increase infrastructure capacity		
			Develop and employ strategies to increase student retention and reduce drop-out		
		Improve the quality assurance for training health training institutions	Establishment of structures for new health training institutions		
			Accreditation of programs and courses		
			Accreditation of health training institutions		
			Recruitment of teachers to deliver the programs and courses		
			Retrain existing HTI faculty staff		
			The NSPHCDA will share the HRH gaps with the HTIs and ensure enrollment targets		
		Ensure alignment between health training institutions,			
		regulatory bodies, and HRH leadership in the states to ensure HRH production is in line with HRH needs	are in line with the gap analysis		
			The regulatory bodies should ensure that the process of acquiring/renewing license is short and affordable		
		Ensure gender equity in HRH production for all cadres	Conduct advocacy campaigns to increase enrollment of female students		

HRH Information system	Strengthen PHC HRH information systems to facilitate effective HRH planning and management	Develop and sustain a functional HRH Information System across the national and state levels	Joint HRH planning and management meetings	NSPHCDA, DPRS	5 years
			Development of a HRHIS with regular updates		
			Training of HRH desk officer and M&E officers		
		Institutionalize structures for HRH reporting and reviews for evidence-based decision making	Review of HRH policies and plans with feedback from all stakeholders including the Niger State public and P H C HRH		
		Ensure the conduct of HRH research through optimal monitoring and evaluation measures	Periodically conduct a HRH gap analysis, this will ensure that policies and plans are tailored to the state's current HRH situation		
		Strengthen the capacity of HRH structures in the states for effective HRH planning, management,	Identify HRH directorates/leaders essential to effective workforce planning and management		
		and development			
			Conduct capacity building sessions of the identified HRH directorates/leaders		

Leadership and Governance	Strengthen leadership, governance, and coordination of the PHC HRH across all levels	Enhance the capacity of the administrators, managers, and supervisors for HRH planning and management at all levels	Conduct leadership and management capacity building sessions for the managers and PHC supervisors at all levels	DPRS, NSPHCDA	12-60 months
		Strengthen the function of HRH administrative bodies to ensure evidence-based HRH planning and management	Train M & E officers to manage HRHIS		
		Enhance responsiveness of HRH policies and plans to the need of the populace	Use the Niger State gap analysis report to inform HRH policies and planning		
		Strengthen communication of HRH information across all levels	Set up a data repository, here data on HRH policy, HRH gap, HCW exit, HRH financing, etc should be made available to essential stakeholders on request		
Monitoring and Evaluation	Strengthen Human Resource	Ensure real- time workforce tracking	Conduct regular workforce assessments to	DPRS, NSPHCDA	5 years
	Management Information System		review progress and adjust strategies as needed.		
		State Budget Allocation	Secure dedicated funding from the state budget.		

Funding and Partnerships		Health Insurance Schemes	Explore contributions from health insurance programs.	MOF, MOP, NSPHCDA, Development Partners	5 years
		Development Partnerships	Engage with international and local partners for support.		

6.0 5-YEAR PHC COSTED RECRUITMENT PLAN

The "New Niger Health Agenda" identifies Human Resources for Health (HRH) as the most critical pillar for achieving Universal Health Coverage. To address the significant staffing gaps identified across the 25 LGAs, the State has developed a strategic costed 5-Year Recruitment Plan. This plan is designed to transition from an emergency staffing posture to a sustainable, qualified workforce that meets the Minimum Service Package (MSP) standards.

The Niger State 5-Year Costed Recruitment Plan provides a strategic roadmap to address critical shortages in health workforce (HRH) through phased recruitment, training, and retention efforts. It targets a total gap of 2,509 health workers across primary health care (PHC) cadres, aligning with state and national health goals. The plan emphasizes rapid action in underserved rural areas, mid-term expansion, and long-term quality assurance. Key elements include upskilling community health extension workers (CHEWs and JCHEWs), rural incentives, and a centralized HRH database.

The plan identifies gaps across eight cadres, totaling 2,509, with phased recruitment. Total estimated cost is ₦1,156,920,782.90 over five years, covering recruitment per cadre. Costs peak in Year 3 due to higher recruitment volume.

Table 6: Targets Prioritize PHC Staffing

Year	% of Gap	Focus Areas	Key Cadres
2026	25%	Rural LGAs urgent needs	Nurses, Midwives, CHEWs
2027	20%	PHC/secondary facilities	Lab techs, GPs
2028	30%	Referral facilities	Midwives, Allied health workers
2029	15%	Urban LGAs/health posts	Supervision roles
2030	10%	Remaining gaps/attrition	Final adjustments

6.0 Quantitative Recruitment Targets

Table 7: Recruitment Plan

Cadre	Total Gap	2026	2027	2028	2029	2030
Nurses/Midwives	990	248	198	297	149	99
CHO	91	23	18	27	14	9
CHEWs**	0	0	0	0	0	0

Medical Record Officer	199	50	40	60	30	20

** Indicate that there are surplus staffs in the cadre

6.1 Fiscal Implications (Costing) for All PHCs in the State

The total financial investment required for this 5-year recruitment drive is estimated at **₦1,156,920,782.90**

Annual Budgetary Breakdown

Year 1 (Heavy Investment): ₦124,131,926.75 (Critical for immediate stabilization).

Year 2: ₦99,305,541.41.

Year 3 (Peak Recruitment): ₦148,958,312.11 (Address 30% of the gap).

Year 4: ₦74,479,156.05.

Year 5 (Maintenance): ₦49,652,770.70.

Table 8: Financial Investment Required for this 5-year Recruitment Drive

Cadre	Total Cost	Year 1	Year 2	Year 3	Year 4	Year 5
Nurses/Midwives	298,506,769	74,626,692	59,701,354	89,552,031	44,776,015	29,850,677

CHO	54,386,493	13,596,623	10,877,299	16,315,948	8,157,974	5,438,649
CHEWs	121,729,160	30,432,290	24,345,832	36,518,748	18,259,374	12,172,916
JCHEWs	573,603,367	143,400,842	114,720,673	172,081,010	86,040,505	57,360,337
Lab Technician	15,554,985	3,888,746	3,110,997	4,666,495	2,333,248	1,555,498
Pharmacy Tech	37,190,470	9,297,618	7,438,094	11,157,141	5,578,571	3,719,047
Env Health	27,360,390	6,840,097	5,472,078	8,208,117	4,104,058	2,736,039
MRO	28,589,150	7,147,287	5,717,830	8,576,745	4,288,372	2,858,915
Total:	1,156,920,783	289,230,196	231,384,157	347,076,235	173,538,117	115,692,078

7.0 CONCLUSION:

Baseline Mapping and recruitment planning are essential exercises for Institutions aiming to maintain a competitive edge in today's fast-paced environment. By systematically analyzing current workforce capabilities, distribution, forecasting future needs, and designing efficient recruitment strategies, institutions like our primary healthcare facilities can ensure they have the right talent in place to drive success while remaining agile in response to new challenges.

The Baseline Mapping Process is a systematic approach used by health systems to assess, organize, and visualize the availability, distribution, and capacity of the health workforce. This process supports evidence-based decision-making for workforce planning, policy formulation, and resource allocation.

The 5-year strategic recruitment plan provides a roadmap for addressing the HRH gaps/challenges in Niger State's primary healthcare system. By implementing targeted recruitment strategies, strengthening HRH management systems, and fostering partnerships, the state can achieve a sustainable and equitable HRH workforce, leading to improved health outcomes for its population.

The Five-Year Costed Recruitment Plan represents a decisive shift from reactive staffing to strategic workforce planning. It acknowledges the scale of the HRH deficit and responds with a phased, data-informed, and financially costed solution. Rather than pursuing rapid but unsustainable hiring, the State has chosen a structured pathway that aligns workforce expansion with training capacity, fiscal space, and service delivery priorities.

The costed recruitment plan for focal BEmONC facilities presents a practical and financially mapped pathway to strengthening maternal and neonatal emergency services. By phasing recruitment, prioritizing critical cadres, and projecting incremental costs over three years, the State positions itself to move from partial service readiness to full functional capacity. Ultimately, the success of this investment will be measured not only in staff numbers but in improved maternal and newborn survival, increased community confidence in facility-based delivery, and sustained 24-hour emergency obstetric care availability.

The plan is a transformative step toward building a resilient and people-centered health system. By adopting a phased, evidence-based approach, the state is not only addressing its immediate workforce challenges but also laying a sustainable foundation for long-term health sector

improvement. Strategic investments in HRH will ensure that every resident, regardless of location, has access to skilled and motivated health professionals, thereby advancing the state's journey toward Universal Health Coverage and better health outcomes for all. Continuous monitoring, evaluation, and adaptation will be crucial to ensure the plan's success and long-term impact.
